#makeITsafe 2.0

Explaining security settings to each other

Aim	The participants explain the security settings on smartphones and tablets to each other in a creative way.
Duration	-
Number of participants	any
Difficulty	easy
Conditions	The activity might take some time depending on how long it takes for the participants' creativity to get going. Suitable for groups
Material	Smartphone

Preparation
-

Description
Depending on the setting, the exercise can be carried out in different ways:
Version 1: Competition – similar to poetry slam

Individually or as a group, the participants create a performance. The aim is to explain the settings on smartphones or tablets as creatively as possible. Examples of terms: access requests of apps, data protection, location services, roaming, ad tracking, etc.

The competition is organised as an event and the winners receive a small prize.

Version 2: Explanations for a specific target group

The participants explain the terms to certain target groups, e.g. younger kids who get their first mobile phone, their own parents/teachers/youth workers, their grandparents, etc.
